

# K.M.G. COLLEGE OF ARTS AND SCIENCE (AUTONOMOUS)

Approved by the Government of Tamil Nadu
Permanently Affiliated to Thiruvalluvar University, Vellore
Recognized under Section 2(f) and 12(B) of the UGC Act 1956
Accredited by NAAC (2nd Cycle) with (CGPA of 3.24/4) 'A' Grade

## PG DEPARTMENT OF MATHEMATICS

**B.Sc., MATHEMATICS** 

SYLLABUS
(CHOICE BASED CREDIT SYSTEM)

**Under** 

LEARNING OUTCOMES-BASED CURRICULUM

FRAMEWORK (LOCF)

(Effective for the Batch of Students Admitted from 2024-2025)

#### **PREFACE**

The curriculum of undergraduate Mathematics is the study of quantity, structure, space and change, focusing on problem solving, with wider scope of application in science, engineering, technology, social sciences etc. The purpose of the outcome-based education is meant to provide an exposure to the fundamental aspects in different branches of Mathematics and its applications, keeping in mind the growing needs for higher education, employability, entrepreneurship and social responsibility. The periodical restructuring of the syllabi is carried out to fulfill the requirements of graduate attributes, qualification descriptors, programme learning outcomes and course outcomes. The outcome-based education enriches the curriculum to deliver the basic principles, synthetic strategies, mechanisms and application-oriented learning for the benefit of students. It also includes self-learning module, minor projects and industrial internship to enable students to get equipped for higher studies and employment. The programme also includes training to students for seminar presentation, preparation of internship reports, hands-on training in lab courses, synthesis and its analysis, developing leadership qualities, organization and participation in the interdepartmental academic competitions. The allied papers provide a platform to strengthen the understanding of the core subjects. The non-major elective courses offer chances to learn and augment interest in other related fields. The outcome-based curriculum is intended to enrich the learning pedagogy to global standards. ICT enabled teaching-learning platforms are provided to students along with the interaction of international Mathematicians. The seminars periodically delivered by subject experts and former professors would certainly help the students to update with latest technology/trends in different fields of Mathematics. The OBE based evaluation methods will reflect the true cognitive levels of the students as the curriculum is designed with course outcomes and cognitive level correlations as per BLOOM's Taxonomy.

In pursuit of the Higher Education Department Policy Note 2022-23 Demand 20, Section 1.4, Tamil Nādu State Council for Higher Education took initiative to revamp the curriculum. On

27 July 2022, a meeting was convened by the Member-Secretary Dr. S. Krishnasamy enlightening

the need of the hour to restructure the curriculum of both Undergraduate and Post-graduate

programmes based on the speeches at the Tamil Nādu Legislative Assembly Budget meeting by

the Honourable Higher Education Minister Dr K. Ponmudy and Honourable Finance Minister Dr.

P. Thiagarajan. At present there are three different modes of imparting education in most of the

educational institutions throughout the globe. Outcome Based Education, Problem Based

Education, and Project Based Education.

Now our Honourable Higher Education Minister announced Industry Aligned Education.

During discussion, Member Secretary announced the importance of question papers and evaluation

as envisaged by the Honourable Chief Secretary to Government Dr, V. IraiAnbu. This is very well

imbedded in Revised Bloom's Taxonomy forms three learning domains: the cognitive

(knowledge), affective(attitude), and psychomotor (skill). This classification enables to estimate

the learning capabilities of students.

Briefly, it is aimed to restructure the curriculum as student-oriented, skill-based, and

institution industry- interaction curriculum with the various courses under "Outcome Based

Education with Problem Based Courses, Project Based Courses, and Industry Aligned

Programmes" having revised Bloom's Taxonomy for evaluating students skills. Three domains:

(i)Cognitive Domain

(Lower levels: K1: Remembering; K2: Understanding; K3: Applying; Higher levels: K4:

Analysing; K5: Evaluating; K6: Creating)

(ii) Affective Domain

(iii) Psychomotor Domain

#### ABOUT THE COLLEGE

The College was founded in the new millennium 2000 by the vision of late Shri.K.M.Govindarajan fondly known as Iyah, with a mission to offer higher education in the fields of Arts and Science to the needy and the poor middle class students of this area and make them fully employable and economically self-reliant. With a humble beginning of launching an elementary school named Thiruvalluvar Elementary School in the year 1952, Iyah groomed it into a Higher Secondary School and later into a college. Education was his soul and breath. The college has grown into a full-fledged educational hub offering 12 under graduate programmes, 8 post graduate programmes, 5 M.Phil research programmes and 4 Ph.D programmes. The college has been accredited with 'A' grade by NAAC in 2nd cycle and recognized under section 2(f) & 12(B) of the UGC act 1956. The College is permanently affiliated to Thiruvalluvar University. The College is also acquired the status of Autonomous from the academic year 2024-2025. The College is an associate member of ICT Academy and registered member of NPTEL and Spoken Tutorials of IIT Bombay. The college is also a member of INFLIBNET and NDL.

#### VISION OF THE COLLEGE

Empower young men and women by educating them in the pursuit of excellence, character building and responsible citizen.

#### MISSION OF THE COLLEGE

Offer higher education in the fields of Arts, Science & Management to the needy and make them fully self-dependent.

#### **QUALITY POLICY OF THE COLLEGE**

KMG Students achieve the best learning results and personal growth with modern education that equip them for working life and a changing society to become deserving citizens.

#### ABOUT THE DEPARTMENT

The Department of Mathematics was Established in the Year 2007 and made a Steady Growth to the Height of Establishing Post Graduate Level in the Year 2010. The Department offers Research Programme (M.Phil) from 2013. Our Aim is to Promote Students in the field of Mathematics and working Knowledge of Mathematics. Every Year Department Organizes National Conference/Seminar, Association Activities and Special Lecturers

#### VISION OF THE DEPARTMENT

➤ To Emerge as a Global Center of Learning, Academic Excellence, and Innovative Research.

#### MISSION OF THE DEPARTMENT

- ➤ Imparting of Quality Mathematics Education and the inculcating of the spirit of Research through Innovative Teaching and Research Methodologies.
- ➤ To Provide an Environment where Students can Learn, become Competent users of Mathematics, and Understand the use of Mathematics in Other Disciplines.

#### PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- **1. Professional Excellence:** Graduates will demonstrate competency and excellence in their chosen fields of study, applying theoretical knowledge to practical situations effectively.
- **2. Character Development:** Graduates will exhibit strong moral and ethical character, upholding values of integrity, honesty, and respect for others in both personal and professional endeavors.
- **3. Leadership and Citizenship:** Graduates will emerge as responsible leaders and active citizens, contributing positively to their communities and society at large through their actions and initiatives.
- **4. Continuous Learning:** Graduates will engage in lifelong learning and professional development activities, adapting to evolving technologies, methodologies, and societal needs.
- **5. Self-Dependency and Entrepreneurship:** Graduates will possess the skills and mindset necessary to be self-reliant and entrepreneurial, capable of creating opportunities for themselves and others through innovation and initiative.
- **6. Effective Communication and Collaboration:** Graduates will demonstrate proficiency in communication skills, both verbal and written, and exhibit the ability to collaborate effectively with diverse teams and stakeholders.
- **7. Global Perspective:** Graduates will have a broad understanding of global issues and perspectives, demonstrating cultural sensitivity and adaptability in multicultural environments.

# PROGRAM OUTCOMES (POs)

On successful completion of the programme, the students will be able to:

| POs  | Graduate Attributes   | Statements  |  |  |  |  |  |  |  |  |
|------|---|---|--|--|--|--|--|--|--|--|
| PO1  | Disciplinary Knowledge  | Acquire detailed knowledge and expertise in all the disciplines of the subject.   |  |  |  |  |  |  |  |  |
| PO2  | Communication Skills  | Ability to express thoughts and ideas effectively in writing, listening and confidently Communicate with others using appropriate media |  |  |  |  |  |  |  |  |
| PO3  | Critical Thinking   | Students will develop aptitude Integrate skills of analysis, critiquing, application and creativity.                                    |  |  |  |  |  |  |  |  |
| PO4  | Analytical Reasoning  | Familiarize to evaluate the reliability and relevance of evidence, collect, analyze and interpret data.                                 |  |  |  |  |  |  |  |  |
| PO5  | Problem Solving   | Problem Solving Capacity to extrapolate the learned competencies to solve different kinds of non-familiar problems.                     |  |  |  |  |  |  |  |  |
| PO6  | Equip the skills in current trends and future expectations for placements and be efficient entrepreneurs by accelerating qualities to facilitate startups in the competitive environment. |   |  |  |  |  |  |  |  |  |
| PO7  | Individual and Team<br>Leadership Skill   | Capability to lead themselves and the team to achieve organizational goals and contribute significantly to society.                     |  |  |  |  |  |  |  |  |
| PO8  | Multicultural<br>Competence   | Possess knowledge of the values and beliefs of multiple cultures and a global perspective.  |  |  |  |  |  |  |  |  |
| PO 9 | Moral and Ethical awareness/reasoning   | Ability to embrace moral/ethical values in conducting one's life.   |  |  |  |  |  |  |  |  |
| PO10 | Lifelong Learning   | Identify the need for skills necessary to be successful in future at personal development and demands of work place.                    |  |  |  |  |  |  |  |  |

## PROGRAM SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Sc., Mathematics, the students will be able to:

| PSOs | Statements   |
|------|--|
| PSO1 | Acquire good knowledge and understanding, to solve specific theoretical & applied problems in different area of mathematics & statistics.  |
| PSO2 | Understand, formulate, develop mathematical arguments, logically and use quantitative models to address issues arising in social sciences, business and other context /fields.   |
| PSO3 | To prepare the students who will demonstrate respectful engagement with other's ideas, behaviors, beliefs and apply diverse frames of references to decisions and actions. To create effective entrepreneurs by enhancing their critical thinking, problem solving, decision making and leadership skill that will facilitate startups and high potential organizations. |

## **Correlation Rubrics:**

| High | Moderate | Low | No Correlation |
|------|----------|-----|----------------|
| 3    | 2        | 1   | -              |

## **Mapping of PSOs with POs:**

|      | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 |
|------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|
| PSO1 | 3   | 3   | 3   | 3   | 3   | 3   | 2   | -   | -   | 2    |
| PSO2 | 3   | 2   | 3   | 3   | 3   | 3   | 2   | -   | -   | 2    |
| PSO3 | 3   | 3   | 3   | 3   | 3   | 3   | 2   | -   | -   | 3    |

| Total    | 23         | 23          | 24           | 23          | 26         | 21          | 140              |

<sup>\*</sup>Part I. II, and Part III components will be separately taken into account for CGPA calculation and classification for the under graduate programme and the other components. IV, V has to be completed during the duration of the programme as per the norms, to be eligible for obtaining the UG degree.

| Title of the Course | ALGEBRA & TRIGONOMETRY                | Hours/Week      | 05    |
|---------------------|---------------------------------------|-----------------|-------|
| Course Code         | AUCMA11                               | Credits         | 04    |
| Category            | CORE M1                               | Year & Semester | I & I |
| Prerequisites       | 12 <sup>th</sup> Standard Mathematics | Regulation      | 2024  |

- ➤ Basic ideas on the Theory of Equations, Matrices and Number Theory.
- ➤ Knowledge to find expansions of trigonometry functions, solve theoretical and applied problems

| UNITS    | Contents  | COs | Cognitive<br>Levels |
|----------|---|-----|---------------------|
| UNIT-I   | Reciprocal Equations-Standard form-Increasing or decreasing the roots of a given equation- Removal of terms-Approximate solutions of roots of polynomials by Horner's method – Related Problems.  Chapter-6: Sections: 16, 16.1, 17, 19, 30   | CO1 | K1<br>K2<br>K3      |
| UNIT-II  | Summation of Series: Binomial— Exponential —Logarithmic series (Theorems without proof) —Related Problems.  Chapter-3: Sections: 10 Chapter -4: Sections 3 to 7   | CO2 | K1<br>K2<br>K3      |
| UNIT-III | Characteristic equation – Eigen values and Eigen Vectors- Similar matrices - Cayley – Hamilton Theorem (Statement only) - Finding powers of square matrix–Inverse of a square matrix up to order 3–Diagonalization of square matrices –Related Problems.  Chapter-2: Sections: 16, 16.1 to 16.4   | CO3 | K1<br>K2<br>K3      |
| UNIT-IV  | . Expansions of $\sin n\theta$ , $\cos n\theta$ in powers of $\sin \theta$ , $\cos \theta$ - Expansion of $\tan n\theta$ in terms of $\tan \theta$ - Expansions of $\cos n\theta$ , $\sin n\theta$ , $\cos n\theta$ $\sin n\theta$ - Expansions of $\tan (\theta 1 + \theta 2 +,, +\theta n)$ - Expansions of $\sin \theta$ , $\cos \theta$ and $\tan \theta$ in terms of $\theta$ -Related Problems. Chapter 2:Sections: 2.1, 2.1.1, 2.1.2 Chapter 3: Sections: 3.1, 3.1.1, 3.2.1, 3.4, 3.4.1 to 3.4.3 | CO4 | K1<br>K2<br>K3      |
| UNIT-V   | Hyperbolic functions – Relation between circular and hyperbolic functions Inverse hyperbolic functions.  Chapter 4: Sections: 4.1 to 4.7  | CO5 | K1<br>K2<br>K3      |

- > To know the methods of solving simultaneous linear equations.
- > To acquire knowledge about forward differences and Backwarddifferences and their relationship.
- > Knowledge about central difference operators and problems basedon various central differences formulae.
- > To study Newton"s divided difference formula and problemsbased on Lagrange"s interpolation formula.

| UNITS    | Contents  | COs | Cognitive<br>Levels |
|----------|---|-----|---------------------|
| UNIT-I   | Solutions of Algebraic and Transcendental Equations: Bisection Method- Iteration Method- Regula-Falsi Method- Newton-Raphson Method.  Chapter -1 :Section 1.1 to1.4   | CO1 | K1<br>K2<br>K3      |
| UNIT-II  | Solutions of Simultaneous Linear Equations: Gauss-Elimination Method, Gauss-Jordan Method, Crout's Method.  Chapter 2:Section 2.1 to 2.3  | CO2 | K1<br>K2<br>K3      |
| UNIT-III | Finite Differences: E Operators and Relation between them-<br>Differences of Polynomial-Factorial Polynomials.<br>Chapter 3:Section 3.1 to 3.4  | CO3 | K1<br>K2<br>K3      |
| UNIT-IV  | Interpolation with Equal Intervals:Newton's Forward and Backward Interpolation formulae. Central Differences Formulae: Gauss-Forward and Backward Formulae.  Chapter 4:Section 4.1to 4.3 (omit 4.1a)  Chapter 5:Section 5.1to 5.4 | CO4 | K1<br>K2<br>K3      |
| UNIT-V   | Interpolation with Unequal Intervals: Divided Differences - Newton's Divided Differences Formula for Interpolation -Lagrange's Formula for Interpolation.  Chapter 6:Section 6.1, 6.2, 6.5&6.7                                    | CO5 | K1<br>K2<br>K3      |

#### **Course Learning Outcomes (for Mapping with POs and PSOs)**

| COs | CO Description   | Cognitive Level |
|-----|--|-----------------|
| CO1 | After studied unit -1, the student will be able to solve Iteration method-Regula-falsi method- Newton-Raphson method.                        | K1,K2,K3        |
| CO2 | After studied unit -2, the student will be able to calculate interpolation values by applying Gauss-Elimination method, Gauss-Jordan method. | K1,K2,K3        |
| CO3 | After studied unit -3, the student will be able to calculate Differences of a polynomial- Factorial polynomials                              | K1,K2,K3        |
| CO4 | After studied unit -4, the student will be able to estimate Central Differences Formulae.  | K1,K2,K3        |
| CO5 | After studied unit -5, the student will be able to estimate the interpolation value for unequal intervals based on Lagrange's formula.       | K1,K2,K3        |

## Course Learning Outcomes (for Mapping with POs and PSOs)

| COs | CO Description  | Cognitive Level |
|-----|---|-----------------|
| CO1 | Prove the binomial theorem and apply it to find the expansions of any $(x + y)n$ and also, solve the related problems   | K1,K2,K3        |
| CO2 | Find the various sequences and series and solve the problems related to them. Explain the principle of counting.  | K1,K2,K3        |
| CO3 | Find the number of permutations and combinations in different cases.  Apply the principle of counting to solve the problems on permutations and combinations  | K1,K2,K3        |
| CO4 | Explain various trigonometric ratios and find them for different angles, including sum of the angles, multiple and sub multiple angles, etc. Also, they can solve the problems using the transformations. | K1,K2,K3        |
| CO5 | Find the limit and derivative of a function at a point, the definite and indefinite integral of a function. Find the points of min/max of a function.   | K1,K2,K3        |

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO1 | 1   | 1   | 1   | 1   | 1   | 1   | 1   | -   | -   | 1    | 3    | 2    | 1    |
| CO2 | 2   | 1   | 1   | 2   | 2   | 1   | 1   | -   | -   | 1    | 3    | 2    | 1    |
| CO3 | 2   | 1   | 1   | 2   | 2   | 1   | 1   | -   | -   | 1    | 3    | 2    | 1    |
| CO4 | 1   | 1   | 1   | 1   | 1   | 1   | 1   | -   | -   | 1    | 3    | 2    | 1    |

| Title of the Course | NUMERICAL METHODS-I<br>(For B.Sc., Computer Science) | Hours/Week      | 04    |
|---------------------|--|-----------------|-------|
| <b>Course Code</b>  | AUEMA13B   | Credits         | 03    |
| Category            | ELECTIVE COURSE -I                                   | Year & Semester | I & I |
| Prerequisites       | 12 <sup>th</sup> Standard Mathematics                | Regulation      | 2024  |

- > To Solve Practical Technical Problems using various Numerical Method Formulae
- > To derive appropriate Numerical Methods to solve Algebraic, Transcendental Equations
- To know the Numerical Methods of Solving Simultaneous Linear Equations
- > To Acquire Knowledge about Forward Difference and Backward Differences and their Relationship Knowledge about Central Difference Operators and Problems based on Various Central Difference Formulae

| UNITS    | Contents  | COs | Cognitive<br>Levels |
|----------|---|-----|---------------------|
| UNIT-I   | Curve Fitting- Principle of Least square  Fitting of straight line $y = ax + b$ parabolay $= ax^2 + bx + c$ exponential curves of forms $y = ax^b$ , $y = e^{bx}$ , and $y = ab^x$ .      | CO1 | K1<br>K2<br>K3      |
| UNIT-II  | The solution of numerical algebraic and transcendental Equations:  Bisection method – Iteration Method – Regula Falsi Method – Newton– Raphson method                                     | CO2 | K1<br>K2<br>K3      |
| UNIT-III | Solution of simultaneous linear algebraic equations: Gauss elimination method – Gauss Jordan method – Method of Triangularization – Gauss Jacobi method – Gauss Seidel method.            | CO3 | K1<br>K2<br>K3      |
| UNIT-IV  | Finite differences Operators Δ, ∇and E - relation between them — factorial polynomials.  Interpolation with equal intervals: Gregory-Newton forward and backward- interpolation formulas. | CO4 | K1<br>K2<br>K3      |
| UNIT-V   | Central differences formulae Operators∆, ∇ and E relation with the other operators. Gauss forward and backward formulae, Stirling's formula and Bessel's formula.                         | CO5 | K1<br>K2<br>K3      |

| Prerequisites       | 12 <sup>th</sup> Standard Mathematics | Regulation      | 2024  |

- ➤ To Solve Practical Technical Problems using various Numerical Method Formulae
- > To derive appropriate Numerical Methods to solve Algebraic, Transcendental Equations
- > To know the Numerical Methods of Solving Simultaneous Linear Equations
- > To Acquire Knowledge about Forward Difference and Backward Differences and their Relationship Knowledge about Central Difference Operators and Problems based on Various Central Difference Formulae

| UNITS    | Contents  | COs | Cognitive<br>Levels |
|----------|---|-----|---------------------|
| UNIT-I   | Curve Fitting- Principle of Least square Fitting of straight line $y = ax + b$ parabola $y = ax^2 + bx + c$ exponential curves of forms $y = ax^b$ , $y = e^{bx}$ , and $y = ab^x$ .      | CO1 | K1<br>K2<br>K3      |
| UNIT-II  | The solution of numerical algebraic and transcendental Equations:  Bisection method – Iteration Method – Regula Falsi Method – Newton– Raphson method                                     | CO2 | K1<br>K2<br>K3      |
| UNIT-III | Solution of simultaneous linear algebraic equations: Gauss elimination method – Gauss Jordan method – Method of Triangularization – Gauss Jacobi method – Gauss Seidel method.            | CO3 | K1<br>K2<br>K3      |
| UNIT-IV  | Finite differences Operators Δ, ∇and E - relation between them — factorial polynomials.  Interpolation with equal intervals: Gregory-Newton forward and backward- interpolation formulas. | CO4 | K1<br>K2<br>K3      |
| UNIT-V   | Central differences formulae Operators∆, ∇ and E relation with the other operators. Gauss forward and backward formulae, Stirling's formula and Bessel's formula.                         | CO5 | K1<br>K2<br>K3      |

#### **Course Learning Outcomes (for Mapping with POs and PSOs)**

| COs | CO Description  | Cognitive Level |
|-----|---|-----------------|
| CO1 | Solve the problems of fitting of straight lines, parabolas and the different form of exponential curves   | K1,K2,K3        |
| CO2 | Solve algebraic equations using various methods like Bisection method, Iteration method, Regula Falsi method and Newton – Raphson method  | K1,K2,K3        |
| CO3 | Estimate the solution of simultaneous linear equations using different numerical methods  | K1,K2,K3        |
| CO4 | Define basic concept of operators $\Delta$ , $\nabla$ and E, Solving interpolation with equal intervals problems using Gregory Newton's forward formula and Newton's backward formula | K1,K2,K3        |
| CO5 | Estimate the solution of central difference formula using the methods Gauss's forward, backward formula, Stirling's formula and Bessel, s formula                                     | K1,K2,K3,       |

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |

| Category            | ELECTIVE COURSE -I                        | Year & Semester | I & I |
| Prerequisites       | 12 <sup>th</sup> Standard Mathematics     | Regulation      | 2024  |

- > To Solve Practical Technical Problems using various Numerical Method Formulae
- ➤ To derive appropriate Numerical Methods to solve Algebraic, Transcendental Equations
- To know the Numerical Methods of Solving Simultaneous Linear Equations
- > To Acquire Knowledge about Forward Difference and Backward Differences and their Relationship Knowledge about Central Difference Operators and Problems based on Various Central Difference Formulae

| UNITS       | Contents  | COs | Cognitive<br>Levels |
|-------------|---|-----|---------------------|
| UNIT-I      | Curve Fitting- Principle of Least square  Fitting of straight line $y = ax + b$ parabola $y = ax^2 + bx + c$ exponential curves of forms $y = ax^b$ , $y = e^{bx}$ , and $y = ab^x$ .                       | CO1 | K1<br>K2<br>K3      |
| UNIT-II     | The solution of numerical algebraic and transcendental Equations:  Bisection method – Iteration Method – Regula Falsi Method – Newton– Raphson method   | CO2 | K1<br>K2<br>K3      |
| UNIT-III    | Solution of simultaneous linear algebraic equations: Gauss elimination method – Gauss Jordan method – Method of Triangularization – Gauss Jacobi method – Gauss Seidel method.                              | CO3 | K1<br>K2<br>K3      |
| UNIT-<br>IV | Finite differences Operators $\Delta$ , $\nabla$ and $E$ - relation between them — factorial polynomials.  Interpolation with equal intervals: Gregory-Newton forward and backward- interpolation formulas. | CO4 | K1<br>K2<br>K3      |
| UNIT-V      | Central differences formulae Operators $\mu$ , $\delta$ and relation with the other operators, Gauss forward and backward formulae, Stirling's formula and Bessel's formula.                                | CO5 | K1<br>K2<br>K3      |

## **Course Learning Outcomes (for Mapping with POs and PSOs)**

| COs | CO Description  | Cognitive Level |
|-----|---|-----------------|
| CO1 | Solve the problems of fitting of straight lines, parabolas and the different form of exponential curves   | K1,K2,K3        |
| CO2 | Solve algebraic equations using various methods like Bisection method, Iteration method, Regula Falsi method and Newton – Raphson method  | K1,K2,K3        |
| CO3 | Estimate the solution of simultaneous linear equations using different numerical methods  | K1,K2,K3        |
| CO4 | Define basic concept of operators $\Delta$ , $\nabla$ and E, Solving interpolation with equal intervals problems using Gregory Newton's forward formula and Newton's backward formula | K1,K2,K3        |
| CO5 | Estimate the solution of central difference formula using the methods Gauss's forward, backward formula, Stirling's formula and Bessel, s formula                                     | K1,K2,K3,       |

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|

| Prerequisites       | 12 <sup>th</sup> Standard Mathematics           | Regulation      | 2024   |

- ➤ To understand and apply the concept of homogeneous equations of second degree to represent straight lines in different forms.
- > To derive polar equations for straight lines, circles, and conic sections, and analyze their geometric properties.
- ➤ To formulate general equations of planes, calculate angles between two planes, and determine perpendicular distances.
- > To calculate the angle between a line and a plane, determine the length of perpendiculars, and analyze coplanar and skew lines.
- To originate equations of spheres, determine lengths of tangents, and analyze sections of spheres.

| UNITS    | Contents   | COs | Cognitive<br>Levels |
|----------|--|-----|---------------------|
|          | Pair of Straight lines   |     | K1                  |
| I:I      | Introduction – Homogeneous equation of second degree – Angle   |     | K2                  |
| UNIT-I   | between the lines – Equation for the bisector of the angle between the lines – Condition for a second degree equation to represent a pair of | CO1 | K3                  |
|          | straight lines. (Chapter 3: Sections 3.1 - 3.5 Pages: 89 - 129).   |     | K4                  |
|          | Polar Coordinates  |     | K1                  |
| UNIT-II  | Introduction – Definition of polar coordinates – Relation between Cartesian coordinates and Polar coordinates – polar                        | CO2 | K2                  |
| E        | equation of a straight line – circle – Polar equation of a conic.  |     | К3                  |
| 5        | (Chapter 9: Sections: 9.1 – 9.7.1 Pages: 480 - 500).   |     | K4,K5               |
|          | Plane  |     | K1                  |
| Ħ.       | Introduction – General equations of plane – Angle between two planes - Perpendicular distance – Plane passing through: Three given           |     | K2                  |
| UNIT-III | points, Intersection of two given planes - Condition for a second degree   | CO3 | К3                  |
| <b>S</b> | equation to represent a pair of planes. (Chapter 12: Sections: 12.1 – 12.12 Pages 585 - 629).  |     | K4,K5               |
|          | Straight Lines   |     | K1                  |
| UNIT-IV  | Introduction – Equations of straight Lines – Angle between a line and plane – Length of the perpendicular – Coplanar lines – Skew lines –    |     | K2                  |
|          | Intersection of three planes.  | CO4 | К3                  |
|          | (Chapter 13: Sections: 13.1 – 13.12 Pages: 630 – 647, 648 - 686).  |     | K4,K5               |

|   | Sphere   |     | K1 |
|---|--|-----|----|
| > | Equations of sphere – Length of the tangent – Section of a sphere  | CO5 | K2 |
|   | <ul> <li>Equation of circle – Intersection of two spheres – Condition for<br/>the orthogonality – Radical planes.</li> </ul> |     | К3 |
| 5 | (Chapter 14: Sections: 14.1 – 14.11 Pages: 687 – 695, 699 - 727).  |     | K4 |
|   |  |     | K5 |

| Prerequisites       | 12 <sup>th</sup> Standard Mathematics   | Regulation      | 2024   |

# **Objectives of the Course:**

- > To evaluate derivatives using Newton's forward and backward differences formulae
- > To acquire the knowledge about evaluation of numerical integration.
- > To evaluate the solution of linear homogeneous difference equations with constant coefficients.

> To obtain numerical solutions to the ordinary differential equations.

|                   | btain numerical solutions to the ordinary differential equations.   | CO  | Cognitive  |
|-------------------|---|-----|------------|
| UNITS             | Contents  | COs | Levels     |
|                   | Numerical Differentiation:  |     | K1         |
| Ξ                 | Derivatives using Newton's Forward and Backward Difference  |     | K2         |
| UNIT-I            | Formulae Derivatives using Stirling's Formula- Derivatives using  |     | K3         |
| $\mathbf{\Omega}$ | Divided Difference Formula- Maxima and Minima using the above Formulae. (Chapter 7 :Section 7.1 to 7.4 & 7.6) | COI | K4,K5      |
|                   | Numerical Integration:  |     | K1         |
| 1.                | Trapezoidal Rule-Simpson's One-ThirdRule - Simpson's Three-Eighth   |     | K2         |
| UNIT-II           | Rule- Weddle's Rule. (Chapter 7 :Section 7.9 & 7.13 to 7.15)  | CO2 | K3         |
| ב                 |   |     | K4,K5      |
|                   | Difference Equations:   |     | K1         |
| Ħ                 | Linear Homogenous and Non Homogenous Difference Equation with   |     | K2         |
| UNIT-III          | constant coefficients- particular integrals for $a^x$ , $x^m$ , $\sin kx$ , $\cos kx$                         |     | К3         |
| 5                 | $a^{x}F(x)$ .  (Chapter 8 : Section 8.1 to 8.4 % 8.6)   | CO3 | K4,K5      |
|                   | (Chapter 8 :Section 8.1 to 8.4 & 8.6)   |     | ,          |
| ·iV               | Numerical solution of Ordinary Differential Equations   |     | K1, K2, K3 |
| Ė                 | (I order only):   |     | K4,K5      |
| UNIT-IV           | Taylor's series method- Picard's method. (Chapter 9: Section 9.5, 9.6)  | CO4 |            |
|                   | Numerical solution of Ordinary Differential Equations   |     | K1         |
| >                 | (I order only):   |     | K2         |

- ➤ The major objective in introducing the Computer Skills course is to impart training for students in Microsoft Office which has different components like MS Word, MS Excel and Power point. Applying the concept of time and distance.
- The course is highly practice oriented rather than regular class room teaching.
- > To acquire knowledge on editor, spread sheet and presentation software.

## **Course Learning Outcomes (for Mapping with POs and PSOs)**

| COs | CO Description   | Cognitive Level |
|-----|--|-----------------|
| CO1 | Analyze and perceive various graph theoretic concepts and familiarize with their applications. | K1,K2,K3,K4     |
| CO2 | Describe about partially ordered sets, Boolean algebra, lattices and their types.              | K1,K2,K3,K4     |
| CO3 | Apply Karnaugh map for simplifying the Boolean expression                                      | K1,K2,K3,K4     |
| CO4 | Demonstrate the skill to construct simple mathematical proofs and to validate.                 | K1,K2,K3,K4     |
| CO5 | Achieve greater accuracy, clarity of thought and language.                                     | K1,K2,K3,K4,K5  |

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |

| Prerequisites       | 12 <sup>th</sup> Standard Mathematics    | Regulation      | 2024   |

## **Objectives of the Course:**

- > To discuss and analyze the concept of gradient, divergence and curl and its properties.
- > To be familiar with Green's, Gauss and Stoke's theorem invector integrals.
- > To find the solution of first order linear partial differential equations.

> To solve the ordinary differential equations by using Laplaceand Inverse Laplace Transform

| UNITS        | Contents  | COs | Cognitive<br>Levels |
|--------------|---|-----|---------------------|
|              | Differentiation of Vectors  Differentiation of vectors – Differential operators – Solenoidal –  |     | K1                  |
| UNIT-I       | Irrotational - Directional derivative - Gradient - Divergence and curl -  |     | K2                  |
|              | Formula involving operator . (Chapter 8: Pages: 329 - 363)  | CO1 | K3                  |
|              | (Chapter 6. Tages. 329 - 303)   |     | K4                  |
|              | Integration of Vectors  |     | <b>K</b> 1          |
| UNIT-II      | Line integrals – Surface integrals – Volume integrals – Statements of Gauss divergence, Green's, Stoke's theorems and its applications –      |     | K2                  |
| N            | verifications.  | CO2 | K3                  |
| n            | (Chapter 8: Pages: 364 - 390, 395 - 418 excluding Green's theorem in space- problems)   |     | K4                  |
| ]            | Partial Differential Equations  |     | <b>K</b> 1          |
| UNIT-III     | Formation of partial differential equations by eliminating arbitrary constants and arbitrary functions – Solutions of standard types of first |     | K2                  |
|              | order equations: $f(p, q) = 0$ , $f(x, p) = g(y, q)$ , $f(x, p, q) = 0$ ,   | CO3 | K3                  |
| Ū            | f(y, p, q) = 0, f(z, p, q) = 0: $z = px + qy + f(p, q)(Chapter 6: Pages: 252 - 269)$  |     | K4,K5               |
| 7            | Laplace Transforms  |     | K1                  |
| UNIT-IV      | Definition – Laplace transforms of $e^{at}$ , cos at, sin at, cosh at, sinh at, $t^n$ $e^{at}f(t)$ , $t^nf(t)$ , $f'(t)$ , $f''(t)$ .         |     | K2                  |
|              | (Chapter 7: Pages: 289 - 298)   | CO4 | K3                  |
| $\mathbf{U}$ | Chapter 7. 1 ages. 207 - 270)   |     | K4,K5               |

| > | Inverse Laplace transforms  Solving differential equations of second order with constant coefficients using Laplace transform.  (Chapter 7: Pages: 299 - 317excluding simultaneous equations -problems) | CO5 | K1, K2,K3,<br>K4, K5 |  |
|---|---|-----|----------------------|--|

| Category            | Elective Course -III                  | Year & Semester | II & III |
| Prerequisites       | 12 <sup>th</sup> Standard Mathematics | Regulation      | 2024     |

- > To make the students to gain wide knowledge in the fundamental concepts of Statistics.
- To understand the idea of random variables and its types.
- To derive certain values in corporate with random variables.
- > To relate the statistical distributions with their a life situations
- > To apply statistical techniques to get the solution store a life problems

| UNITS    | Contents  | COs | Cognitive<br>Levels |
|----------|---|-----|---------------------|
|          | Random variables: Distribution function-Discrete random variable-             |     | K1                  |
|          | Continuous random variable.   |     | K2                  |
| UNIT-1   | Chapter-5 (5.1 to 5.4)  | CO1 | K3                  |
|          |   |     | K4,K5               |
|          | Mathematical expectation-Expected value of function of a random               |     | K1                  |
|          | variable- Properties of expectation - Properties of variance -                |     | K2                  |
| UNIT-II  | Covariance.   | CO2 | К3                  |
| n        | Chapter-6 (6.1 to 6.6)  |     | K4,K5               |
|          | Moment generating function-Properties of cumulants- Chebychev's in            |     | K1                  |
| H-       | equality-Binomial distribution.   |     | K2                  |
| UNIT-III | Chapter-7 (7.1,7.2,7.5 ), Chapter-8 (8.4 )                                    | CO3 | K3                  |
| 5        | Chapter-7 (7.1,7.2,7.5), Chapter-5 (6.4)                                      | 003 | K4,K5               |
|          | Poisson Distribution : Properties, Moments of Poisson Distribution—           |     | K1                  |
| UNIT-IV  | Geometric Distribution: Moment Generating Function of Geometric Distribution. |     | K2                  |
|          |   | CO4 | K3                  |
| 5        | Chapter-8 (8.5,8.7 to 8.7.3)  |     | K4,K5               |

| >   | Normal Distribution: Moment Generating Function of Normal Distribution, Mean Deviation about Mean – Gamma Distribution - Exponential Distribution. |     | K1<br>K2    |  |
|-----|--|-----|-------------|--|
| UNI | Chapter-9 (9.1,9.2.5,9.2.10,9.5& 9.8)  | CO5 | K3<br>K4,K5 |  |

| Prerequisites       |                          | Regulation      | 2024     |

- > To introduce the students to Geogebra.
- > To enhance understanding of mathematical concepts.
- > To make the students to progressively build skills and knowledge.
- > To leverage geometry for advanced applications.
- > To ensure prerequisite knowledge and skills.

| UNITS   | Contents  | COs        | Cognitive<br>Levels  |
|---------|---|------------|----------------------|
| UNIT-I  | Introduction to Geogebra and Matrices Introduction to Geogebra and its Applications- Exploring the Geogebra interface- Creating and manipulating matrices - Matrix operations (addition, multiplication) - Rank and Transpose of a matrix- Inverse of a matrix. | CO1        | K1<br>K2<br>K3<br>K4 |
| NIT-II  | <b>Trigonometry and Geogebra</b> Trigonometric functions and identities- Graphing trigonometric functions - Using Geogebra to solve trigonometric equations-Trigonometric applications and Geogebra tools.  |            | K1<br>K2<br>K3<br>K4 |
| III-TIN | Roots of Polynomials  Solving polynomial equations- Graphical representation of polynomial functions- Finding roots and factors of polynomials - Maxima and Minima of polynomial equations.   |            | K1<br>K2<br>K3<br>K4 |
| J-LINI  | Limits and Continuity Introduction to limits and their graphical representation-Calculating limits-Exploring the concept of continuity - Continuity and limits in real-world scenarios  | <b>~</b> . | K1<br>K2<br>K3K4     |

|      | Advanced Topics and Practical Applications                            |     | K1    | Ī |
|------|---|-----|-------|---|
| [-V  | Further exploration of mathematical concepts- Real-world applications |     | K2    |   |
| UNIT | and case studies of the topics covered- Interactive problem-solving.  | CO5 | K3    |   |
| C    |   |     | K4,K6 |   |

- **1. Online Geogebra Documentation:**Geogebra provides extensive online documentation and tutorials to support learning and exploration.
- **2. Additional Reading:** Students are encouraged to explore additional resources related to specific topics covered in the course, such as calculus textbooks for more in-depth coverage of differentiation and integration.
- **3.** Course Materials: Lecture notes, slides, and assignments provided by the instructor throughout the course will be essential references.
- **4. Geogebra Software:** Ensureyou have access to the latest version of GeoGebra, which can be downloaded for free from the Geogebra website

# **Course Learning Outcomes (for Mapping with POs and PSOs)**

| COs | CO Description                          | Cognitive Level |
|-----|---|-----------------|
| CO1 | Learn the basics of statistical methods | K1,K2,K3,K4     |
| CO2 | Understanding of measures of location   | K1,K2,K3,K4     |
| CO3 | understanding of measures of dispersion | K1,K2,K3,K4     |
| CO4 | Understand about Measures of skewness   | K1,K2,K3,K4     |
| CO5 | Understand about correlation            | K1,K2,K3,K4,K5  |

|                 | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |
|-----------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO1             | 3   | 3   | 3   | 3   | 2   | 1   | 1   | -   | -   | 1    | 1    | 1    | 1    |
| CO <sub>2</sub> | 2   | 2   | 3   | 3   | 2   | -   | 1   | -   | -   | 1    | 1    | 1    | 1    |
| CO3             | 3   | 3   | 3   | 3   | 2   | 1   | 1   | -   | -   | 1    | 1    | 2    | 1    |
| CO4             | 3   | 2   | 3   | 3   | 2   | -   | 1   | -   | -   | 1    | 1    | 2    | 1    |
| CO5             | 3   | 2   | 3   | 3   | 2   | 1   | 1   | -   | -   | 1    | 1    | 2    | 1    |

| Title of the Course | DISCRETE MATHEMATICS-I (For B.Sc.,Data Science) | Hours/Week     | 03       |
|---------------------|---|----------------|----------|
| Course Code         | AUEMA33A  | Credits        | 03       |
| Category            | Elective Course-III                             | Year &Semester | II & III |
| Prerequisites       | 12 <sup>th</sup> Standard Mathematics           | Regulation     | 2024     |

- > To make the students understand the Mathematical Logic and truth table.
- > To know about how and when to use set theory.
- > To understand the discrete structure, storage structure.
- > To understand the methods of Relations and ordering.
- > To understand the functions, classifications, and types.

| UNITS       | Contents   | COs | Cognitive |
|-------------|--|-----|-----------|
| UNIIS       | Contents   |     | Levels    |
| UNIT-I      | Mathematical logic: Connectives, well formed formulas, Tautology, Equivalence of formulas, Tautological implications,                          | CO1 | K1        |
|             | Duality law, Normal forms.   |     | K2        |
|             |  |     | К3        |
| UNIT-II     | <b>Set Theor</b> y: Basic Concept of Set Theory–Operations on Sets– Venn   | CO2 | K1        |
|             | Diagram  |     | K2        |
|             |  |     | К3        |
| UNIT-III    | <b>Representation of Discrete Structure</b> : Data Structure – Storage Structure - Sequential Allocation – Pointers and Linked Allocation –    |     | K1        |
|             | An Application of Bit Represented Sets   |     | K2        |
|             |  |     | К3        |
| <b>&gt;</b> | <b>Relations and Ordering:</b> Relations—Properties of Binary Relations in a set — Relation Matrix and the Graph of a Relation — Partition and |     | K1        |
| T-L         | Covering of a set – Equivalence Relations – Compatibility Relations  | CO4 | K2        |
| UNIT-IV     | <ul> <li>Composition of Binary Relations –Partial Ordering – Partially Ordered set.</li> </ul>   |     | К3        |
|             | <b>Functions</b> Definitions of functions and its Classification – Types –   |     | K1        |
| T-V         | Examples–Composition of functions–Inverse functions–Binary and nary operations–Characteristic function of a set–Hashing functions –            |     | K2        |
| V-TINU      | ursive functions   | CO5 | К3        |

1.Discrete Mathematical Structures with applications to computer Science J.P Tremblay and R.P Manohar (Mc.Graw Hill, 1997.)
